AER-DEC® Integrated Sink

Soap. Rinse. Dry. All three steps without taking any.

Designed to work hand-in-hand with the AER-DEC Integrated Sink, these soap dispensers promote cleanliness at every level.

AER-DEC sensor-activated faucets are engineered to meet the demands of the commercial restroom.

Soap. Rinse. Dry. All three steps without taking any.

Step up to the future of sustainable restroom design—the AER-DEC® Integrated Sink. The AER-DEC is the perfect innovation for any high-end restroom. Soap dispenser, faucet, hand dryer, and sink basin all designed to work together as one beautiful, touch-free, hygienic, highly efficient system.

AER-DEC® brings the power and innovation of hand dryers off the wall and right to your hands to eliminate water on the floor caused by dripping hands and wet paper towels.

Fixture options that go above and beyond

Choose from three innovative product lines that promote cleanliness at every level, all available in our five distinct finishes.

BASYS®

Infuse your space with a sleek and minimalist aesthetic with BASYS fixtures, inspired by the majestic allure of glaciers. These fixtures not only embrace angular simplicity but also incorporate a host of features that can be effortlessly accessed from above the sink deck.

When prioritizing both design and ease of maintenance, look no further than the BASYS style fixtures. Offering various faucet heights and boasting Sloan's stunning selection of finishes, BASYS carves its path in the design landscape.

AER-DEC® features

Sink basin: Keeping all three elements of the hand wash process in the basin reduces slip and fall risk from water dripping on the floor

Soap dispenser: Dispenses a pre-measured application of soap to reduce soap waste

Faucets: Battery, plug-in, hardwired, or power-harvesting options (solar or turbine) for energy efficient flexibility

Faucets, soap dispenser, and hand dryers: Active Infrared sensing for hygienic touch-free operation

Hand dryers: Adjustable dry speed and heat settings for sound, speed, and temperature comfort

Hand dryers: Industry leading Electrostatic HEPA Filter removes 99.97% of dust, mold, bacteria, and airborne particles as small as 0.3 microns.

Clark Street®

Bring architectural facets to your next project with Clark Street fixtures. Inspired by prisms, Clark Street fixture designs are geometric and faceted to refract light as you approach it. The elegant appearance suits all high-end commercial applications for a dazzling aesthetic.

Whether you need that extra element to tie it all together or durable hardware that keeps your vision whole, these premium faucets, soap dispensers, and hand dryers deliver.

Rush Street®

Fuse glamour and technology with Rush Street fixtures. Inspired by industrial forms, Rush Street fixtures bring together soft corners, cylindrical shapes, and rounded edges to create a simple, curved aesthetic with a streamlined look and feel.

This premium, touch-free trio can add the finishing touch to bring your vision to life and offers durable hardware that will deliver for years to come.

All fixture types are available in five spectacular finishes

AirBasin brings innovation to airflow

Each component of the AER-DEC® is designed to create a fully integrated system. The key to that integration is the patent-pending AirBasin that redirects air and water flow to eliminate backsplash and updraft.

The touch-free, hygienic design of the AER-DEC saves water, reduces energy consumption, and reduces the need for paper towels. It's good for the environment. Good for the user. Good for business.

Configured to fit your space

Choose a configuration

Basins can be centered or offset to accommodate traffic flow or space restrictions. All basins are 23.5 inches deep and can be continuous trough style or individual basins. The AER-DEC® meets ADA requirements if properly installed.

Individual basins

Continuous trough basin

Single side counter extension

Dual side counter extensions

Choose a width and mounting type

The AER-DEC Integrated Sink offers flexibility to suit any space. Basins can be ordered in custom widths or in standard increments of 30 inches, up to 240 inches. The sink can be mounted in a variety of ways to fit snugly into an alcove, have a wall on either side, or mount directly to an open wall with open side. Build your restroom around the AER-DEC, or the AER-DEC around your existing restroom.

Endless options from top to bottom

Elevate your restroom experience with AER-DEC's extensive customizable options. Add color with LED lighting, change your sink deck edges, add optional countertop spacing, or add convenient bag hooks. Choose between three enclosure styles including the standard angled stainless enclosure that features hold-open doors for easy maintenance, magnetized for convenient access and designed to stay open when needed. For a unique touch, opt for a vertical enclosure with stainless hold-open option or laminated cabinet-style doors, offering over 300+ laminate choices for added design flexibility.
