

## **Sloan Debuts ESD-360 Top-fill Soap Dispenser**

*First Closed, Top-fill Soap Dispenser in Market Provides Hassle-free Maintenance*

FRANKLIN PARK, IL (August 31, 2022) – [Sloan](#), the world’s leading manufacturer of commercial plumbing systems, today launched its ESD-360 Top-fill Soap Dispenser to eliminate the hassle of going under the sink deck to refill soap reservoirs.

[Sloan’s top-fill soap dispenser](#) is the only top-fill closed soap dispenser on the market, reducing labor time and eliminating safety concerns. Medical-grade connections provide a hygienic environment for soap transfer without drips or spills.

“Up until this point, facility maintenance professionals were required to crawl underneath the sink to refill soap dispensers,” said Morgan Kish, Sloan Product Line Manager for Faucets, Soap Dispensers, Hand Dryers, and Showerheads. “Thanks to Sloan’s innovative top-fill design, we’ve provided a safer, simpler alternative to the soap refill process.”

The new soap dispenser includes a top cover that slides open via a tamper-resistant unlocking feature. Once open, the soap refill bottle can be inserted into the spout. Until the dispenser recognizes that the refill is an approved refill, it will not open or allow filling into the reservoir.

This provides a safety feature for facility managers and owners that vandalism of the dispenser, by filling the dispenser with any unapproved liquid, is not possible. This also eliminates air inside the reservoir that can encourage the growth of bacteria. The patented refill bottle also locks into place, allowing for hands-free refills to max capacity without the risk of overflow or soap waste.

In partnership with Purell®<sup>®</sup>, this dispenser comes with two REDIFOAM™ Healthy Soap refill bottles.

The foam is created at the time of dispensing, so the formula retains its foam quality and provides the same amount of soap every time. The soap is free of harsh preservatives, antibacterials, parabens, phthalates, fragrances, and dyes, and the refill bottle is fully recyclable.
