

October 17, 2024

Sloan Valve Company  
10500 Seymour Avenue  
Franklin Park, IL 60131-1259

To whom it may concern:

This letter is written on behalf of Sloan Valve Company, who has retained the services of SCS Global Services, an independent, accredited third-party certification body and an approved International Living Futures Institute – Declare label + Red List Free verifier to review the products that are listed below against the “International Living Future Institute’s Red List” and provide a conformance letter. The following products have been reviewed:

- **Sloan Lavatories**
- **Sloan Water Fixtures**
- **Sloan Urinals**

#### **ILFI – LBC Red List Chemicals**

The International Living Future Institute (ILFI) has developed the “LBC Red List” materials. Builders seeking to meet the certification requirements of the Living Building Challenge must verify the materials of construction do not contain the substance on the “Red List” above 100 ppm.

SCS Global Services reviewed the above product to identify the chemical composition down to 100 ppm (0.01%) and assessed whether any ingredients are present on the ILFI LBC Red List. Based on a review of the product composition, the above listed products are not known to contain any substance(s) identified as ILFI LBC Red List Chemicals above 100 ppm (0.01%). It is not possible to rule out the possibility if they are present as non-intentionally added trace impurities. SCS does not conduct testing to determine the presence or absence of the listed chemicals of concern in raw materials or the listed products.

Should you have any questions regarding the assessment process, please contact me directly at [Hamare@scsglobalservices.com](mailto:Hamare@scsglobalservices.com) or +1.510.583.3813.

Sincerely,

Hanna Amare

## Addendum

---

### *Living Building Challenge Red List – Effective July 2019 (Version 4.0)*

[The Red List - International Living Future Institute \(living-future.org\)](https://living-future.org)

The current Red List, effective April 2023 for LBC 4.0 was further expanded to include the addition of chemicals within three of the 19 chemical classes comprising the Red List, which now totals more than 11,750 individual chemicals (ILFI 2022).

• Alkylphenols • Asbestos • Bisphenol A (BPZ) • Cadmium • Chlorinated Polyethylene & Chlorosulfonated Polyethylene • Chlorobenzenes • Chlorofluorocarbons (CFCs) • Chloroprene (Neoprene) • Chromium VI • Chlorinated Polyvinyl Chloride (CPVC) • Formaldehyde (added) • Halogenated Flame Retardants • Hydrochlorofluorocarbons (HCFCs) • Lead (added) • Mercury • Polychlorinated Biphenyls (PCBs) • Perfluorinated Compounds (PFCs) • Petrochemical Fertilizers and Pesticides • Phthalates • Polyvinyl Chloride (PVC) • Polyvinylidene Chloride (PVDC) • Short Chain Chlorinated Paraffins • Wood treatments containing Creosote, Arsenic, or Pentachlorophenol • Volatile Organic Compounds (VOCs) in wet applied products
